

Summer Engineering / Environmental Intern

SEMS, Inc, is seeking a passionate and motivated Engineering Intern to join our team during the 2025 summer season. As an intern, you will have the opportunity to work alongside experienced engineers and consultants on a variety of projects with environmental challenges.

Responsibilities:

- Assist with fieldwork activities, including site assessments, data collection, and environmental sampling
- Support engineering design and analysis tasks, such as drafting plans, conducting calculations, and performing simulations
- Collaborate with team members to develop and implement environmental management plans and remediation strategies
- Participate in meetings, presentations, and client interactions to gain exposure to project management processes and client relations
- Perform other duties and responsibilities as assigned by supervisors

Skills & Requirements:

- Working towards a bachelor's degree in engineering, geology, or other environmental sciences
- Strong academic background with coursework in environmental science, engineering principles, and relevant technical skills.
- Excellent communication skills, both verbal and written, with the ability to work effectively in a team environment
- Reliable and responsible individual with the ability to manage time efficiently and meet project deadlines.
- Knowledgeable in the use of Microsoft Office software
- Previous internship or work experience in environmental consulting, engineering, or related field is a plus but not required
- Able to pass a physical including respirator fit testing and pulmonary function test
- Able to travel and work a flexible schedule
- Valid United States Driver's License

Benefits:

- Hands-on experience working on real-world environmental projects
- Mentorship from experienced professionals in the field
- Opportunity to network with industry experts and potential future employers
- 40 HR Hazwoper and Basic Safety Training
